This section is one of 43 Excerpta Medica abstract journals which together cover the complete field of biomedical science. The abstracts in each issue are arranged according to subject and may be scanned for current awareness on general topics. To help with more specific questions, each issue contains a detailed Table of Contents, Author Index and Subject Index. These are cumulated in the last issue of each volume (10 or 12 issues) enabling detailed retrospective searches to be carried out on various specific subjects.

TABLE OF CONTENTS

A detailed, decimal subject classification, especially designed for the section, is used to sequence the abstracts in each issue. The most important elements of this classification are printed on the inside front cover together with the page number on which the first abstract in that category appears. A cumulative Table of Contents containing the complete classification is produced for each volume. Please note that abstracts are published only once per section in the most relevant sub-category. No cross-references are provided between subcategories and possibly related abstracts published under another category.

ABSTRACT SECTION

The abstracts are grouped into chapters, paragraphs and if appropriate sub-paragraphs, each headed by a short descriptive phrase. Within each (sub)category, abstracts are numbered in sequence of their accession to the E.M. database. This number is used as a key in the Author and Subject Indexes. Each abstract is preceded by the bibliographic details of the original paper, consisting of the English title, the original language title, the names and initials of up to four authors, the address of the first author, the abbreviated title of the journal, year of publication and volume number/issue number (page numbers).

AUTHOR INDEX

The Author Index should be used to find papers by a particular author and is found at the back of each issue immediately following the Abstract section. Each entry consists of the author's name preceded by the abstract number under which the appropriate item may be found in the Abstract section. Where more than 4 authors exist, only the first three are named.

SUBJECT INDEX

The Subject Index should be used to find out what has been published on a particular specific subject. Each entry term, printed in bold, is followed first by the other entry terms assigned to that article, in alphabetical order, then by secondary terms and free text (if appropriate) describing the article in more detail and finally by the Abstract number. If the entry term is the key to more than one abstract, it is replaced by - for second and subsequent abstracts. The various indexing terms occurring in each entry form a 'mini-abstract' reflecting the contents of the original document and facilitating a decision as to the possible relevance of the full abstract.

MALIMET*

Specialist indexers may assign any specific terms which come to mind when reading the article and these are then carefully controlled by a computerized authority file called MALIMET* (Master List of Medical Indexing Terms). In this way, minor spelling variations, synonyms and linguistically different terms are translated into the preferred terminology to ensure a consistent Subject Index. New terms are added continually to Malimet to reflect the continuing development of medical science, but only after careful review by the board of Chief Editors.

COMPUTER SEARCHING

While the abstract journals provide ready access to the major articles in the subject matter of the section, references to articles on interdisciplinary matters or articles from less important sources can more effectively be retrieved by computer. The Excerpta Medica database EMBASE,* contains from 1½ to 2 times as many references as are announced in the abstract journals, each classified and indexed from multiple points of view.

For further details, write to:

Excerpta Medica Database Division, P.O. Box 1126, 1000 BC Amsterdam The Netherlands
or Excerpta Medica Inc., P.O. Box 3085, Princeton, NJ 08540 USA

* MALIMET and EMBASE are Trade Marks of Excerpta Medica.

CONTENTS

1. GENERAL ASPECTS	1, 63, 129, 189, 259, 325, 391, 455, 519, 581.
1.1. History	- , - , - , - , - , - , - , - , 519, - .
1.2. Components	1, 63, 129, 189, 259, 325, 391, 455, 519, 581.
1.3. Standards	- , 63, - , - , - , - , 391, - , - , - .
2. BIOPHYSICS AND BIOENGINEERING	1, 63, 129, 189, 259, 325, 391, 455, 519, 581.
2.1. Fundamental concepts	3, 65, 131, 189, 261, 327, 392, 457, 522, 584.
2.2. Mechanical systems	4, 66, 135, 192, 263, 331, 395, 458, 522, 585.
2.3. Heat and thermodynamics	6, 70, 137, 194, 267, 334, 399, 461, 525, 590.
2.4. Bioacoustics	6, 70, 138, 195, 267, 335, 400, 461, - , 590.
2.5. Biooptics	8, 71, 140, 198, 269, 336, 401, 462, 526, 591.
2.6. Gas physics	9, 72, 142, 200, 270, 337, 402, 464, 527, 593.
2.7. Fluid flow systems	9, 73, 142, 201, 270, 338, 403, 465, 528, 593.
2.8. Electrical systems	11, 73, 143, 202, 271, 338, 405, 467, 529, 594.
2.9. Nuclear biophysics	13, 76, 145, 205, 274, 343, 408, 469, 533, 597.
3. GENERAL INSTRUMENTATION	15, 79, 146, 211, 276, 349, 410, 471, 535, 599.
3.1. Transducers	- , - , 147, 211, 279, - , 410, 471, - , - .
3.2. Amplifiers	16, 79, 147, 212, - , 349, 410, 471, - , 599.
3.3. Indicators	- , - , - , 212, - , - , 411, 472, - , - .
3.4. Recorders	- , - , - , - , 279, - , - , - , - , - .
3.5. Generators	16, 80, 147, 212, - , 349, - , 473, - , 600.
3.6. Telemetric devices	16, 80, 147, 213, 279, 349, 411, 473, 536, 600.
3.7. Data loggers	- , - , - , - , - , - , - , - , - , - .
3.8. Cameras	18, 81, 148, 213, 280, 350, 411, 474, 536, 601.
4. COMPUTERS	18, 82, 149, 214, 280, 351, 412, 474, 537, 601.
4.1. Averagers	- , - , - , - , - , 351, - , - , - , - .
4.2. Analog computers	18, - , - , 214, - , - , - , - , - , - .
4.3. Digital computers	19, 82, 149, 214, 280, 351, - , 474, - , 601.
4.4. Hybrid computers	- , - , - , - , - , - , - , - , - , - .
5. SPECIFIC MEASUREMENTS	19, 82, 150, 215, 281, 351, 412, 475, 537, 601.
5.1. Temperature measurement	19, 82, - , 215, - , 351, - , 475, 537, 601.
5.2. Time measurement	- , 82, - , - , - , - , - , 475, - , 602.
5.3. Frequency measurement	- , - , - , - , 281, - , - , - , - , 602.
5.4. Pressure measurement	19, - , 150, 216, - , - , - , 476, - , 602.
5.5. Flow measurement	20, - , 150, 216, 281, - , 412, - , - , 602.
5.6. Flow resistance measurement	- , - , - , - , - , - , - , - , - , 603.
5.7. Volume measurement	- , 83, - , 216, 281, - , 413, - , 537, - .
5.8. Density measurement	- , - , - , - , - , - , - , - , 537, - .
5.9. Acceleration measurement	- , - , - , - , - , - , - , - , - , - .
5.10. Displacement measurement	- , 83, 150, - , - , - , - , - , - , - .
5.11. Electrical phenomena	20, 83, 151, 216, 281, 351, 413, 476, 537, - .
5.11.1. Electrical activity measurement	20, - , - , - , 282, 352, 414, - , 537, 603.
5.11.2. Impedance measurement	21, 83, 151, 216, 282, 352, 414, 477, - , - .
5.12. Gas concentration measurement	21, 83, 151, 217, 282, 352, 414, 477, 539, 603.
5.13. Hydrogen ion concentration measurement	- , 88, 152, 218, 284, - , 414, 478, 539, 604.
5.14. Radiation measurement	21, 88, - , 218, - , 353, - , - , - , 604.
5.14.1. Visible light	22, 89, 152, 218, 284, 353, - , 478, - , 605.
5.14.2. Ultraviolet radiation	23, - , 153, 218, - , 354, 415, 479, - , 605.
5.14.3. Infrared radiation	23, - , 153, 219, - , - , 415, 480, - , - .
5.14.4. Radiowaves	24, 89, 153, 219, 284, 354, 415, 480, - , 606.
5.14.5. Roentgen radiation	25, - , 154, 219, 285, 355, 416, 481, 540, 606.
5.14.6. Alpha, beta and gamma radiation	25, 89, 154, 220, 285, 355, 416, 481, 540, 606.
5.14.7. Neutrons	27, 90, 155, 220, 286, 356, 418, 481, 541, 608.
5.14.8. Cosmic radiation	- , - , - , - , - , 356, - , 482, - , - .
